

MACIEJ GŁOWNIA

TECHINICAL BUSINESS ANALYST

PERSONAL PROFILE

Experienced Technical Business Analyst working closely with clients and IT teams to translate business requirements into actionable solutions. Skilled in requirements analysis, project delivery, and understanding technical constraints.

WORK EXPERIENCE

Business Analyst

Billtrust (Fintech – AR Automation) [Mar 2025 - now]

• Business Analysis

- Translating customer needs into clear requirements, technical specifications, and templates.
- Bridging business needs and technical capabilities to ensure seamless implementation.
- Validating complex data files and mappings for accuracy and compliance.
- Collaborating with the Project Manager to conduct projects from intake to go-live.
- Configuring backend application components based on client data (e.g., ERP integration).

Stack: Jira, Confluence, XML, SQL, ERP, Salesforce, Clarizen, M365.

Technical Business Analyst / Software Engineer

XTMIXTRF (Translation Management Systems)

[Jun 2023 - Feb 2025]

• Business Analysis

- Captured stakeholder requirements and documented technical specifications.
- Defined system components from inception to completion.
- Authored test cases and user stories to ensure clarity and alignment.

• Software Engineering

- Built and optimized Spring Boot applications in Java.
- Maintained and enhanced Groovy scripts.
- Customized frontends with JavaScript and Angular.
- Applied BDD for structured testing.
- Developed an internal test automation tool (TF).
- Conducted API testing with Postman.
- Automated workflows with Bash scripts.

Stack: Jira, Confluence, Coda, Miro, Java, Groovy, SpringBoot, JavaScript, Angular, Git, REST API, Swagger, Insomnia, GCP.
